

Bricks for Kids Colorcubes

Encourage kid to explore their cognition related to

CB-01

The structure method of our color cubes is not easy to loosen, and the wheel does not fall off during the rotation process. If the child is able to complete the illustrations in the various instruction manuals. I believe that the children do not need to look at any lesson plans in the future, that is, they can constantly create the works conceived in their hearts through their own understanding of the changes in our Color cubes building blocks.
